Albums and Books

Your Wedding Story Album is individually crafted. We fully discuss with you an extensive range of options to create your album with flair and an individual style. We only include albums which are of the finest quality, professionally printed, and designed with character and originality personally by us giving you the best.

Every album or book we create is different, thus reflecting the originality of your wedding.

Why do we include an album with our packages? The 21st Century will be the century of lost images if we are not careful. Why do we say this? Today, unlike the past, most people view their images on a computer screen, if at all. This is fine, but with a lost hard drive all of those images could be lost and CDs also degrade and after a time are unreadable. The best way to hand your memories down is to have a book or album of your images.

We include a large choice of covers, around 40 with the Venezia package. There is a variety of materials to choose from. If you wish to "upgrade" your album, eg larger, metallic printing etc, we can do this for an extra fee, calculated from the cost of your included album to the cost of the upgraded album.

We are also able to offer a choice of matted albums from Queensberry and Jørgensen. We can show you samples of the actual cloths, leathers and materials that may be selected.

Additional images may be added to the album at an extra cost of £6. Images may be added up to the page capacity of the album. Below are links to our main album suppliers.
